

MELANIE L. FRYMAN

Developer + Data Analyst

+ EXPERIENCE

DATA ANALYST / DEVELOPER

PatientFocus / Feb 2015 - Oct 2015

A patient-pay and customer service solution for healthcare providers. Performed complex analyses in an evolving data environment. Worked closely with client services and sales teams to identify business information needs and provide ongoing reports. Documented and improved existing data ingestion and cleaning processes. Developed account management tools in the internal administrative application that enabled staff to work independently of the IT team. Participated in preliminary redesign of existing web applications (client, patient, and administrative portals) and environment infrastructure.

APPRENTICE

Nashville Software School / July 2014 - Jan 2015

An intensive, full-time six month bootcamp for software engineering and web development. Developed full-stack web and hybrid-mobile applications in a rigorous and fast-paced environment. Designed and implemented multiple solo and group projects. Collaborated with peers utilizing technologies such as git, pair programming, and test-driven development.

EVALUATION SPECIALIST

Edvantia & McREL International / Aug 2011 - June 2014

Conducted external research and evaluation activities for multiple education projects including initiatives funded by the U.S. Department of Education and U.S. Department of Labor. Specialized in survey design, administration, and data analysis. Designed data collection instruments; collected, prepared, and analyzed quantitative data, including social network data; and developed reports and presentations of evaluation findings.

Developer + Data Analyst

+ PROJECTS

Brownie Points

Capstone for NSS

UI/UX, Frontend, and Backend

For the final capstone project at NSS, I used the NASH (Node.js, AngularJS, SQL, Hapi) Stack to create a social web application for friends to award, track, and exchange brownie points.

Nashville Investor

Mid-term Group Capstone for NSS

Project Manager, UI/UX, and Frontend

Leveraging publically available data APIs on the Nashville real estate market, we created a MEAN Stack web app that provides users with much-needed information on potential real estate investments.

+ AWARDS

Appr

HackTennessee 7 - Second Place

Group Project

The development team at PatientFocus joined forces at HackTN 7 to create a game that parodies life at a technology startup. As the first technical hire at a budding startup, you must battle legacy code, raise funds, fix computers, and squash bugs, before your funding runs out. Appr was built using Phaser, a HTML5 game framework, and features original artwork. Play at <http://melanie.fryman.io/appr-ht7>.

NashVestTN

HackNashville 6 - Finalist

Group Project: Backend & Community Engagement

Utilizing the MEAN Stack, Ionic, and Cordova, we created Mobile and Desktop apps that help non-profit organizations increase their community impact by engaging the Millennial Generation. See more at <http://nashvestn.herokuapp.com>.
